

# AO VET Seminar—Common complications in fracture repair in large animals

July 7, 2022  
09:00–13:30

Porto,  
Portugal

REGISTER NOW!

## Seminar description

Complications are a reality of fracture repair and arthrodesis in horses. Many can be avoided or minimized by being aware of biomechanics and predisposing factors. Others are unavoidable, but their resolution may be aided by early diagnosis and appropriate treatment. Some of the key points that will be touched are Intra and Postoperative complications of Lag screw fixation and of plate fixation and how to prevent infection in fracture repair.

## Target participants

The target is surgeons comfortable taking over decision-making responsibility for the treatment of complex injuries (ideally those that have taken an Advanced AO VET course already).

## Course fee

EUR 160.

To register please click on the Congress website:  
[https://www.ecvs.org/services/asm\\_registration.php](https://www.ecvs.org/services/asm_registration.php)  
and follow the instructions.

## Goal of the seminar

The aim of this seminar is to deal with and learning from our complications. An experienced faculty will bring their own cases for a lively, interactive session on common complications in fracture repair. We also encourage you to send us your own cases.

## Chairperson

**Christoph Lischer** (Germany)

## Faculty

**Jeff Watking** (USA)  
**Michelle Jackson** (CH)  
**Fabrice Rossignol** (France)
